

**BECHTEL BWXT IDAHO, LLC
SOFTWARE LICENSE AGREEMENT**

For purposes of this license agreement the term "Licensor" shall mean the business entity which developed or holds licensing rights to the software being provided through this purchase order. The term "Licensee" shall mean Contractor or its duly authorized representative(s).

1. **SOFTWARE** Licensor grants a nonexclusive royalty free license to Licensee for the use of the proprietary computer software, including all programs, codes, manuals, forms, reports, displays and other system material noted by Licensor as proprietary data ("software").
2. **LICENSE** Use of the software is authorized as follows: Licensee may use the software on one or more computers, unless otherwise specified on the purchase order, including use of the software at any U.S. Government installation within the United States to which the computer may be transferred. Licensee may use the software on a replacement computer or with a backup computer operative. Licensee may copy the software for safekeeping, backup, replacement of a defective copy, revision or for program error verification. Licensee shall treat the software bearing a copyright notice as a published copyrighted work.
3. **TERM** The term of this license agreement is effective upon award of purchase order by Licensee and remains in force in perpetuity, unless otherwise terminated by Licensee or Licensor. This may be terminated by Licensee following one month prior written notice or by Licensor for any material breach of its terms that remains uncured 30 days after written notice thereof to Licensee. Upon termination, Licensee will certify in writing that the software and all copies have been destroyed.
4. **TITLE** and ownership rights in the software remain at all times with Licensor, and Licensee will not sell, lien, sublicense, encumber or otherwise dispose of the software without the Licensor's prior written approval. Licensor agrees that any authorized software modifications, to the extent that they do not contain the software code, shall belong solely and exclusively to the Licensee and/or the U.S. Government. If Licensor discontinues production and development of the software while this agreement is in effect, Licensee shall have the right to a copy of the source code for the software, by written request to Licensor or its authorized representative.
5. **CONFIDENTIALITY** Licensee will use all reasonable efforts, commensurate with the procedures Licensee uses to restrict unauthorized use of similar products, to insure that the software, designated in writing or by an appropriate stamp or legend indicating its proprietary or confidential nature, is not made available or disclosed to third persons or entities other than Licensee or the U.S. Government for purposes related to Licensee's authorized use, without the written consent of Licensor.
6. Confidential or proprietary information does not include information that: is already known to Licensee at the time of disclosure; is or becomes publicly known through no wrongful act of Licensee; is received from a third party without similar restrictions and without a breach of this license agreement; is independently developed by or for Licensee; is furnished to a third party by Licensor without similar restrictions of the third party's rights; or is approved for release by written authorization of Licensor.
7. **GUARANTEE OF OWNERSHIP/INFRINGEMENT** Licensor warrants that the software does not infringe upon or violate any patent, copyright, trade secret or any other proprietary rights of any third party. Licensor warrants that it owns and possesses all rights and interest in the software necessary to grant this license. Licensor further agrees to indemnify and hold harmless Licensee and the Government against any and all alleged or proven claims or suits for infringement of patents, trademarks, copyrights or proprietary data arising out of any breach or claimed breach of this guarantee including all of Licensee's costs in enforcing this provision. In the event of any infringement claim by any third party against Licensee or the U.S. Government, Licensee or U.S. Government shall promptly notify Licensor and Licensor

may be granted the opportunity to defend and/or settle such claim to the extent allowed by the U.S. Department of Energy. This indemnification includes all damages, costs, losses, liabilities and expenses (including reasonable attorneys fees incurred within the scope of this indemnity or in enforcing this provision), arising out of or related to Licensor's warranties or indemnification obligations stated herein. Licensee and the U.S. Government still retain the right to participate and protect their respective interests in those claims for which permission to defend is granted.

8. Licensor has no liability to Licensee for claims that are based on: the combination or utilization of software with software not developed by Licensor; the Licensee's modifications to the software; or Licensee's use of a version of the software other than the latest if such claim would have been avoided had Licensee been using the latest version.
9. If Licensee is precluded from using the software because of an actual or claimed infringement of any patent right, copyright, trademark or other intellectual property or proprietary right, then Licensor will procure at its expense and at Licensee's option; the right for Licensee's to continue to use the software; or replace or modification of the software to make it noninfringing; or procurement of a substantially equivalent replacement software acceptable to Licensee. If Licensor fails to perform its obligation under this Paragraph, Licensee is entitled to prompt payment of the purchase price.
10. These provisions will survive termination or expiration if this license agreement for any reason and Licensor's obligation to provide compensation thereunder is not subject to or governed by any limitations of liability that may be expressed elsewhere in this license agreement.
11. **TRANSFERABILITY OF SOFTWARE LICENSE** Licensee may transfer this license agreement and all software, subject to all of the terms and conditions herein, to U. S. Department of Energy, (DOE) or any successor Contractor to Licensee if Licensee is no longer the prime management and operating Contractor for the DOE at the INEEL. This license agreement and all related software will not otherwise be transferred and/or assigned by either party without the written consent of the other party, which consent shall not be unreasonably withheld or delayed. Licensor has no warranty obligations to the extent that defects occur as a result of Licensee's revision to the software.
12. **WARRANTY AND MAINTENANCE** Licensor warrants that the software and its supporting documentation conform to the software specifications and written descriptions of its supporting documentation for one year. Licensor will replace or repair for one year after its receipt, if it does not conform to the software specifications and written descriptions. Licensor will refund the purchase price to Licensee if the Licensor fails to make the software conform 60 days after written notice of such non-conformance from Licensee. The warranty includes one year of free software maintenance, enhancement, and update service. Licensor is not liable for any damages resulting from loss of data, profits, or for any incidental, indirect, special, or consequential damages arising from Licensee's use of the software. **THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE UNLESS INDICATED OTHERWISE ON LICENSEE'S PURCHASE ORDER. THIS WARRANTY APPLIES TO THE PURCHASE OF SOFTWARE LICENSES AND IS IN LIEU OF THE GENERAL WARRANTY PROVISIONS OF THE APPLICABLE GENERAL PROVISIONS.**
